## Education

---

### Ryerson University | Bachelor of Engineering | GPA 3.84

- Academic Excellence Scholarship Award
- Dean's List Recipient
- RU Hacks Finalist

## Technical Skills

---

<b>Programming Languages</b>	JavaScript, Python, HTML, CSS
<b>Web Development</b>	React, Vue, Bootstrap, Tailwind
<b>Architecture</b>	AWS Solutions Architect
<b>Design</b>	Figma

## Work Experience

---

### Frontend Developer, Coil Labs

Aug 2020 - May 2021

- Designed a **40 page** Progressive Web Application for mobile and desktop devices using **Figma**
- Implemented the aforementioned **Figma** designs using **Vue**, **Cypress** and **Mirage**

### Software Developer Intern, Hatch

Aug 2019 - July 2020

- Designed, developed and deployed a native iOS and Android mobile auditing application using **Flutter**, **Python** and **Flask**
- Developed a native desktop application designed to optimize scheduling using **JavaScript** and **Electron**

### Frontend Developer, Ryerson University

Jan 2019 - May 2019

- Designed, developed and deployed a static conference website for Ryerson University using **Vue**
- Developed and deployed an accompanying native iOS and Android mobile application using **Flutter**

## Projects

---

### Student Professor Communication Software

Sept 2018 - Oct 2019

- Envisioned, designed and built a social networking website using **Vue**, **Node**, **Express** and **MongoDB** with everything hosted on **AWS**
- The website was designed to save professors and students 35+ hours per semester

### Autonomous Robot | Course Project, COE 538 Micro Processor

Fall 2018

- Developed a custom algorithm in **Assembly** for a microprocessor based robot complete a maze
- **Only student** to complete the algorithm, have the robot solve the maze, memorize the path and return home
